# PrintBar 990 Printing Rubber Blanket

**Scope of application: Commercial rotary printing**

Italian craft, Good surface rubber suitable for demanding printing requirements,The waterproof design of the base cloth reflects its excellent printing suitability.

## Parameter

**Ink suitability:** traditional ink
**Rubber surface color:** light blue
**Thickness：** 1.7mm
**Average load N/cm2 0.23mm sunken：** 250
**surfaceness（Ra micro）:**1
**Maximum linear elongation（%）:**<0.9
**Tensile Strength：（N/mm）:**>60
**Base cloth reinforced - waterproof/solvent nature：** Yes

## Additional information

**Blanket construction：** The fine grinding of the rubber surface is combined with a strong skeleton structure，Make the blanket have a stable thickness.。

## Structure and characteristics

**Color**: Blue
**Surface treatment**: Fine grinding
**Roughness：** 0.8-1.1μm
**Max Tension（DIN16621）：** >4000N
**Thickness and layers：** 1.7mm±0.02(3layers）
**Hardness（IRHD/SHOREA）:**76±3°
**Compressible layer:** Hole sealing type。
